TEAMWORK

With the passing of each year, a great number of facts are added to man's increasing store of knowledge. Not over seventy-five years ago a man of superior intelligence could possess a working knowledge of all of science. Now, however, the realm of the known is so vast that it is necessary for men to specialize in order to master one small but deep corner of scientific knowledge.

Thus we have the physician, who diagnoses disease and prescribes medication and treatment. The pharmacist compounds and dispenses. Both the physician and the pharmacist benefit greatly from the researches of the biologist, the chemist, the physiologist, and the physicist, to name but a few. Through the teamwork of the allied sciences, increasingly better medical service for all is assured.
